

MiX Fleet Manager Premium

A fully comprehensive fleet management solution designed to improve safety, reduce operating costs and risk, increase profitability, and enhance customer service.

For fleet operators today, it's crucial to not only track vehicles, but to also have immediate access to meaningful information about drivers and vehicles at all times. MiX Fleet Manager Premium from MiX Telematics is an end-to-end solution designed to give fleet operators all the tools they need to manage a highly effective and safe operation.

Fleet efficiency at its best.

MiX Fleet Manager Premium offers fleet operators unlimited access to information about their vehicles and drivers, with a host of features, tools and reports to help maximise return on investment.

The solution comprises a sophisticated on-board computer, which collects and transmits valuable vehicle and driver data. This data is hosted in one of several top-tier data centres, and information is accessible online or via a mobile app (for Android or iOS).

Our customers from around the world agree: whatever the goal – be it to save fuel, improve safety, increase utilisation or enhance customer service – MiX Fleet Manager Premium is proven to bring about guaranteed and significant results.

Key insights into your fleet's performance.

The MiX Fleet Manager Premium software platform is where all the magic happens. As well as being completely secure, it is packed with features to help fleet operators make informed and timely decisions regarding the performance of their fleet.

Advanced tracking

- Get a real-time view of a vehicle or asset's position – whether it's stationary or on the move – and which driver is behind the wheel.
- View information relating to speed, driving direction, ignition status, driving violations, past trips and more.

Proactive monitoring

- Peruse live information streams that are user-defined.
- See event information as well as messages to and from the connected asset and/or driver.
- For priority trips, undock the stream for a continuous view of activity while navigating the rest of the application.

Robust reporting

- Review and analyse data in detail as well as in dynamic and customisable formats.
- Reports include movement, location, trip and utilisation, as well as driver scoring, fuel, event violations and cost analysis reports.

Optional services, add-ons and accessories

- Video recording
- In-cab navigation
- Jobs and messaging
- Satellite communication
- Driver engagement
- Hours of Service (HOS)
- Journey management

Reduce, improve and prosper.

The rising cost of fuel has a major impact on fleet businesses. But with MiX Fleet Manager Premium, not only can fuel consumption be monitored and reduced by up to 15% in some instances, but behavioural aspects relating to efficient and safe driving can be detected and corrected thanks to advanced reporting and analytics.

Vehicles that are driven well naturally perform more efficiently and require less maintenance. MiX Fleet Manager Premium provides all the tools necessary to monitor, manage and improve driver behaviour – not only for efficiency purposes, but for increased safety too.

Getting the most from a fleet is another major concern. Which is why activity timelines are particularly useful to illustrate utilisation patterns and assist in boosting fleet efficiency. Service and licencing schedules can be managed through automated reminders.

Because MiX Fleet Manager Premium provides visibility over a fleet, customer service is one more aspect that improves as a result. The solution includes a find-nearest-vehicle function, which allows fleet managers to identify the closest vehicle to a customer site and route them there directly.
